

Field Service Engineer - Nordic

BlueScientific Ltd specializes in the sales and service of scientific instruments for research, development and process control applications in both academic and industrial markets. We are the authorized partner for some of the World's leading scientific instruments brands, including Bruker, Thermo Fisher and Ametek and employ staff throughout the UK, Ireland and Nordic region. Due to sustained growth, we are now seeking to appoint a highly motivated individual to our Nordic service and support team, in the role of Field Service Engineer.

Territory: the Nordic countries, including Sweden, Denmark, Norway, Finland and Iceland

Location: Field based / Home office in Sweden. Preferably in the Malmö, Stockholm or Gothenburg area

Role Description: As a territory-based Field Service Engineer, you are responsible for installation, service & support of certain products within the company's portfolio of scientific instrumentation across the Nordic countries.

Examples of Products: Atomic Force Microscopes (AFM), X-ray Diffractometers (XRD), X-ray Fluorescence Spectrometers (XRF), Micro X-Ray Fluorescence Spectrometers (μ XRF), Total Reflection X-Ray Fluorescence Spectrometers (TXRF).

Key responsibilities within the role include:

- Installation and commissioning of new instruments at customer sites.
- Training users on basic operation of instruments.
- Planning & carrying out onsite scheduled routine preventative maintenance.
- Responding to customer service calls, which will have been logged via our service centre initially, providing telephone, e-mail, and remote online technical support as required.
- When necessary, visiting customer sites to carry out further diagnostics and repair work to return customer systems to good working order.
- Documentation of all related service jobs in our CRM-system.
- Ensure that our customers receive all relevant documentation after a job is completed.
- Liaising with the instruments manufacturers to expedite the resolution of all customer service issues as quickly as possible.
- Participate in mandatory service trainings on site at our various principals' factories.

Requirements:

- Background in electrical, mechanical engineering or physical sciences is highly desirable
- Familiarity with X-ray and electron beam generation is desirable
- Strong interest and ideally hands-on experience with scientific instrumentation
- Knowledge of electrical and mechanical principals
- Strong communications skills in Swedish (any other Nordic language skills is an advantage)
- Strong communications skills in English (our corporate language)
- Highly self-motivated and able to work independently to meet agreed deadlines
- Prepared to travel according to customer and company needs
- Ability to independently plan customer visits and travel
- Ability to work collaboratively in a team environment with a strong positive "can do" attitude
- Empathic, analytical and problem-solving skills are needed
- A valid driver's license

About BlueScientific:

Established in 2013, we are an ambitious, dynamic and fast-growing business, and offer a supportive work environment for our employees, with excellent opportunities for career development. The ethos of the company, which operates under strong ethical terms, is one of developing our personnel, with coaching, training and career growth opportunities as well as empowering them to be able to give great customer service.

BlueScientific is an equal opportunities employer and offers a competitive benefits package including performance-related bonus, pension and private health insurance.

The employment includes company car, laptop, mobile phone and other tools as required.
